

Covid-19 Food Supply Easy

In this solution, I have created a user class/modal and updated the values based on user input. As required the special food item changes based on given age and gender. And Profile info gives the age demography of users and food info gives the quantity of food items required.

Intro Page

Home Screen

Survey Page

The image displays three sequential screenshots of a mobile application's survey page. The page is titled "Complete the Survey" and contains several input fields and dropdown menus. The first screenshot shows the top section with fields for "Enter Your Name", "Enter Your Aadhar", and "Enter Your Age". The second screenshot shows the middle section with fields for "Rice needed per day in grams", "Dal needed per day in grams", and "Select your Gender". The third screenshot shows the bottom section with fields for "Rice needed per day in grams", "Dal needed per day in grams", and "Select Required Special Food". Each screenshot has a "Submit" button at the bottom.

Profile Info

The image shows a mobile application's profile information screen. The screen has a dark purple header with the title "Profile Info". Below the header, there is a light gray rounded rectangle containing a list of profile information items. Each item consists of a label and a value.

Profile Info

Infant	1
Children	2
Adult Male	1
Adult Female	2
Adult Other	1
Old	2
