

Covid-19 Food Supply Easy

In this solution, I have created a user class/modal and updated the values based on user input. As required the special food item changes based on given age and gender. And Profile info gives the age demography of users and food info gives the quantity of food items required.

Intro Page

Home Screen

Survey Page

The image displays three sequential screenshots of a mobile application's survey page. The title 'Complete the Survey' is at the top of each screen. The form is organized into three columns. The first column contains fields for 'Enter Your Name', 'Enter Your Aadhar', 'Enter Your Age', and 'Rice needed per day in grams'. The second column contains fields for 'Enter Your Age', 'Rice needed per day in grams', 'Dal needed per day in grams', 'Select your Gender', and 'Select Required Special Food'. The third column contains fields for 'Rice', 'Dal needed per day in grams', 'Select your Gender', 'Select Required Special Food', and 'Select Required Special Food'. Each field is a text input or a dropdown menu. At the bottom of each column is a purple 'Submit' button. The status bar at the top of each screen shows the time as 5:25 or 5:26 and various system icons.

Profile Info

The image shows a mobile application screen titled 'Profile Info'. It features a list of demographic categories and their corresponding counts, displayed in a light gray rounded rectangle on a dark purple background. The categories and counts are: Infant (1), Children (2), Adult Male (1), Adult Female (2), Adult Other (1), and Old (2). The status bar at the top shows the time as 5:26 and system icons.
